

**TRAPP - Training for APPrentices – ERASMUS+**  
close to apprentices in the VET system!

**On February 12 and 13, the Steering Committee TRAPP relative to apprentices' mobilities was held in Bologna!**  
As a reminder, this innovative project, lasting 24 months, aims to facilitate, secure and promote long-term mobility during training.

To develop this long mobility in Europe and thus create a real dynamic within the apprenticeship paths, the partnership has identified four issues for which it wants to provide answers.

Two days of intense work in Bologna (It) in the presence of European Project Managers, educational managers and trainers enabled the group to agree on the first encouraging results. So:

1

Legal issue

2

Human issue

3

Pedagogical issue

4

Certification issue

Still to be agreed on essential aspects such as maintaining human resources in the sending companies, the precise methods of validation of the educational path and assessment of skills.

- Technical documents summarize the legal results governing mobility, for flexible and efficient use !
- A guide specifies the methods of apprentices' preparation and reception, according to a common and proven methodology !
- The respective teaching practises are identified in order to be confronted and shared, to guarantee pedagogical continuity to the learner !
- The framework for implementing certification has been set!

**Next Steering Committee: Wednesday 3rd and Thursday 4th June 2020 in Espoo (Finland) !**
