

## A long-term mobility for the apprentices? It is possible!

### Thanks to the tools developed by the European project TRaining for APPrentices (TRAPP)

For more than 2 years, TRAPP partners have been developing **innovative tools and solutions to facilitate, secure and promote long-term mobility of apprentices in Europe**. Tested during the implementation of 5 pilot mobilities of 5 to 8 weeks, **these solutions provide answers to the main obstacles to long-term mobility of apprentices**, encountered by European mobility coordinators and vocational training centres.

Discover all the tools from TRAPP project:

#### Clarifying and securing the legal framework for the apprentices abroad

With:

- **A report** clarifying the administrative and legal aspects to be considered to secure apprentices during a long-term mobility, enriched with practical examples and recommendations from the experience of TRAPP partners.
- **A toolkit** with the templates of the legal documents used to set up pilot mobilities within the framework of TRAPP.

#### Ensuring an equivalent presence in human resources

With:

- **A methodological guide** to understand what cross-mobilities are, as solutions to ensure HR equivalence in companies and how to organize them, enriched with practical examples and recommendations from TRAPP experience.
- **A toolkit** to facilitate the recruitment of apprentices and companies and to promote good collaboration between in-company trainers, teachers and apprentices during the time of the mobility.

#### Guaranteeing the continuity of the apprentice's educational path during the mobility

With:

- **A steps-by-steps pedagogical guide** to ensure a coherent educational program thanks to the implementation of a Learning Agreement in line with the apprentice's curriculum.
- **Useful templates** to easily implement and replicate the different steps for new mobilities.
- **A collection of digital tools** to allow remote learning of theoretical subjects while being abroad.

#### Valorization of the professional skills acquired during a mobility

With:

**A report** including:

- Information on the **dimensions to consider for the recognition and assessment of skills**.
- Information and examples of **European and national assessment and valorization tools and methodologies** used for TRAPP pilot mobilities.
- And **additional resources** experimented with TRAPP to improve the recognition of the skills acquired abroad.
